

Testimonials

"The Standex System is up to date, easy to navigate and enables staff to document appropriately within both our nursing home and the domiciliary care service....staff are concentrating each day on our Pensioner experience to make it special, rather than trying to interpret documentation and perhaps missing relevant data. Thank you Standex Systems..."

Excerpt from Care Quality Commission report:

"...people new to the service had a full and complete pre-admission assessment that included relevant risk assessments which were comprehensive and informative for staff to refer to when the person was admitted.

Detailed support plans in place...were personalised and provided details about what was important for people...

Care plans were detailed and had been appropriately updated when there are changes with regular reviews on a monthly basis. This meant there was an up to date record for staff about how to meet people's individual needs."

*Sue Jones, Manager at Brookthorpe Hall Care Centre, about the Standex Systems **Care Planning Handbook***

"Can I just say how helpful your Care Planning Handbook has been to me since I started this role. It is now my new best friend I do not start any shift without it by my side.

The pointers make writing care plans so much easier and I must say we received very positive comments when we received our annual inspection from Gloucestershire Council on how our care plans had become very person centred and informative.

I would recommend this book to absolutely everyone and would not be without mine"

"We have used Standex Systems documentation since 1998. Since that early start we have been generally very satisfied with the quality and variety of the documentation provided. We have found that Standex materials comply with Care Quality Commission regulations and those of the Local Authority.

The system of documentation is colour coded, easy to understand and use and provides a holistic and up to date view of all of our residents. Staff find the system intuitive and simple with very little training, enabling staff to evidence the excellent care they are giving in line with legislation and best practice."

*Dr. S. H. Curry, Resident Proprietor at The Manor House, about the **Standex Systems Care Planning Documentation***

Testimonials

"I would like to say that using Standex Systems has complimented our systems and contributed to our good CQC rating. The documents are simple to use, comprehensive and detailed."

Elizabeth Hancock, Business Manager at Fulford Nursing Home, about the Standex Systems Care Planning Documentation

"We have used Standex for a number of years now. It allows us to document accurately and clearly to professionals and relatives alike. The Standex System covers every area of care and re-ordering is simple and always delivered promptly."

Kamal Gill, Home Manager at Hamilton Nursing Home, about the Standex Systems Care Planning Documentation

"In order to deliver person centred care to the individuals we care for, detailed care planning is essential. Our care plans need to reflect the individual needs of our residents and the bespoke care we intend to offer each individual in order to support them with all aspects of daily living. We currently use Standex Systems for our care plans and we have found the Standex Care planning handbooks to be extremely valuable. The handbook is a concise, useful tool which we can use as a guide during care planning with individuals. The book is very user friendly and gives a detailed guide to points to consider in each care plan and outlines elements of good care planning."

Lesley McCready, Residential Lead at Vida Healthcare, about the Standex Systems Care Planning Handbook

Clare Baker, Manager at Balgowan Nursing Home, about the Standex Systems Care Planning Documentation

"We have been praised for the quality of our care planning system by the Care Quality Commission and Local Authority."

Testimonials

"Since we have been using the Standex system we have found we are able to record clear information, with plenty of room to record. New starters have also said information is easy to find. The care plans look professional and have been inspected by Derbyshire County Council who said that they liked them."

Colleen Joyce, Manager at Stanton Manor, about the Standex Systems Care Planning Documentation

Linda Dearman, Administrator at Knyveton Hall, about the Standex Systems Care Planning Documentation

"I recently set myself the task of tidying up our storage cellar, armed with many black plastic bags, I readied myself for the enormous task ahead.

Upon entering the cellar, I found myself surrounded by years and years of brightly colour paper, a decade of life histories, mobility needs & daily care plans. It was then that I realised, how could we have recorded all this information without your help.

Each old file brought back memories of residents long departs, their history, right in front of me, still easy to read. It made me realise & appreciate how your company has 'organised me', kept me up to date with new needs & recording tools, whilst always providing a helpful & prompt service.

I must also add that our GP, district nurse team, social services, and CQC also find the system easy to read, organised, easy to use and, most of all, practical.

Thank you Standex for such excellent service."

"I would be more than happy to confirm that we have been using the Standex System for many years as our main Care Plan/Recording System.

We have just ordered the corresponding Domiciliary Paperwork for use within our provision of 'Care at Home'.

CQC always comments on the fact that the paperwork is fully comprehensive/robust and ensures a factual account of all our Residents' ongoing and reflective needs as they occur.

During our reviews the family members can easily see the parts of the Care Plan system that they wish to.

We look forward to using it within our new 'Care at Home' provision in Suffolk."

Testimonials

Adam Yates, Business Service Manager at Greenways Nursing Home, about the Standex Systems **Care Planning Documentation**

"Standex have been providing our care planning documentation for a number of years now, and have always provided a high quality service. They have worked with us to develop documents that fully support our commitment to high quality care and the records associated with it, and it has definitely been a benefit to us. Their delivery is usually quick and their customer service is also very good."
