

New Forms in Stock!

21.285 Cornell Depression Scale

Used to detect depression in those with dementia.

- An alternative to 21.083 Depression Scale (for those without dementia)
- Based on normal everyday routines
- Ratings are based on symptoms and signs
- Area to record observations, action taken and current medication
- Score indicates level of possible depression
- Used to help create robust care plans

21.286 Abbey Pain Scale

A pain scale for those who cannot verbalise their pain e.g. those with dementia

- Alternative to Doloplus Pain Scale (21.081)
- Ratings based on observations
- Area to record score, last pain relief given and comments (including action taken)
- To be used as overall pain management plan
- Score indicates type and level of pain
- Used to help formulate robust care plans

21.288 Well-Being Profile

An indicator of well-being for those with dementia

- Score gives a guide to the service user's level of well-being
- Well-Being guidance on the form includes: procedure, making use of the well-being profile, observations, things to consider and examples
- To be done monthly to monitor levels of well-being
- Assists in the development of robust care plans
